14. General Objectives

Complementos de Microeconomia aims to complement the knowledge acquired in Microeconomics, namely by addressing topics related to market structures, exchanges, externalities, public goods and asymmetric information, as well as issues related to government failures in the context of public choice and behavioural economics.

15. Specific Objectives

The specific objectives of this course are to provide the theoretical/methodological tools to understand the economic rationality of markets and agents in competitive and non-competitive settings, using examples and problems from the real economy.

16. Skills to be acquired

Analytical skills related to concepts and models explaining how markets operate in a context of imperfect competition and State intervention;

Ability to apply economic models to real economic situations.

Critical understanding of the contemporary economy at national and international level.

17. Teaching Methodology

The classes will be mainly composed by oral presentation by the teacher and practical exercises. One topic per class will be exposed, accompanied by practical complements whenever it is appropriate. In tutorial classes it is intended to provide a more personalized monitoring of students, assisting and guiding the study and providing the necessary clarifications regarding the theoretical-practical subjects.
