14. General Objectives

It is intended to give the student the most complete view possible of the panorama of architectural thought throughout the 20th century. In this way, reflection will be promoted around the thought and practice of architecture and the city, in order to promote a linked understanding of modernity and contemporaneity. The subjects are developed on a chronological basis, but are sheltered under major conceptual themes that allow a richer understanding of the period in question.

15. Specific Objectives

Give the student a base as complete as possible of knowledge about architectural thought in the path to contemporaneity.

Contribute to the maturation of your critical sense, duly substantiated.

Summon the inevitable understanding between Theory and Practice.

16. Skills to be acquired

Knowledge of architecture as a cultural and historical phenomenon. Knowledge of architecture as a scientific phenomenon, taking into account the sources and importance, validity and use, methods and research techniques. Contribute to the maturation of your critical sense, duly substantiated.
