

UNIVERSIDADE LUSÍADA
LISBOA

Course Unit Program
Mathematics

Academic Year 2024/2025

1. Organic Unit

Faculty of Business and Economic Sciences

2. Course

ECONOMICS

3. Cycle

1st

4. Course Unit

Mathematics (03302)

5. Scientific Area

6. Curricular Year

1st

7. Type of Curricular Unit / Semester

1st Semester

UNIVERSIDADE LUSÍADA
LISBOA

8. Class type and workload (work time)

Theoretical classes:

Practical classes:

Theoretical-Practical Classes 30,00

Tutorial Guidance: 20,00

9. ECTS Credits

6,00

10. Scientific Area Coordinator

11. Regent

Prof. Doutora MARIA ADELAIDE DUARTE CARREIRA LEITE VIDEIRA

12. Assistants

13. Teaching Language

Portuguese

14. General Objectives

To introduce the main mathematical tools, fundamental to the comprehension of several subjects in economy and management area.

15. Specific Objectives

Capacitar os estudantes

?na resolução e discussão de sistemas de equações, pelo método de Gauss;

?em operar com matrizes;

?na resolução de problemas de optimização com funções de uma variável.

16. Skills to be acquired

Students should be able to solve and do the discussion of systems of equations, using the Gaussian method, in matrix algebra and solving optimisation problems with functions of one variable.

17. Teaching Methodology

The course is organised in theoretical/practical sessions (with presentation of main concepts and properties) supported by tutorial sessions where examples of application will be presented.

18. Course Unit Program

UNIVERSIDADE LUSÍADA
LISBOA

1. Matrix Calculus

1.1. Systems of linear equations. Gauss method.

1.2. Determinants. Calculation of determinants by the Gauss method and by the Laplace method.

1.3. Operations with matrices: addition, multiplication by a real number and multiplication.

1.4. Inverse matrix and resolution of matrix equations.

2. Differential calculus complements in R

2.1. Generalities about real functions of real variable.

2.2. The concept of derivative

2.3. Application of derivatives to the study of functions. Optimisation issues.

2.4. Cauchy's rule.

19. Assessment Methods

The continuous assessment component consists of two points written during the semester

20. Didactic Resources

bibliographic indications and a theoretical-practical workbook available on Moodle.

21. Sustainability Objectives

The knowledge acquired in the course is essential for the various aspects of in economy and management.

Specialised academic training is essential for society to ensure its progress in all its components.

22. Keywords

Matrices

Determinant

Derivative

Optimisation

23. Main Bibliography

Author(s): António Monteiro
Title: Álgebra Linear e Geometria Analítica
Edition: 1ª Year: 2001
Local: Lisboa
Publisher: Ed MacGraw-Hill

Author(s): António Monteiro
Title: Matrizes
Edition: 1ª Year: 2016
Local: Lisboa
Publisher: Dashöfer

Author(s): J. Campos Ferreira
Title: Introdução à Análise Matemática
Edition: 11ª Year: 2014
Local: Lisboa
Publisher: Fundação Calouste Gulbenkian

24. Complementary Bibliography

Author(s): Ron Larson, Robert P. Hostetler, & Bruce H. Edwards
Title: Cálculo
Edition: 1ª Year: 2006
Local: São Paulo, Brasil
Publisher: MacGraw-Hill Interamericana do Brasil

Author(s): Earl W. Swokowski
Title: Cálculo com Geometria Analítica
Edition: 1ª Year: 1995
Local: São Paulo, Brasil
Publisher: Makron Books
