Portuguese

14. General Objectives

Psychological assessment is an exclusive area of psychologists. Understanding its basic processes is the first step towards a consolidated learning of this tool. Thus, this curricular unit aims to develop in students the skills of reflection, decision-making, and clinical judgment in psychological assessment, including knowledge of its techniques, procedures, and phases.

15. Specific Objectives

1. Understand psychological assessment as a scientific instrument that validates the psychologist's performance
2. Know the basic concepts underlying psychological assessment that allow understanding its different dimensions and contexts of application.
3. Understand the importance of the Clinical Interview and associated techniques in the psychological assessment process.
4. Master the ethics underlying psychological assessment.
5. Understand the application of different models and underlying

16. Skills to be acquired
