14. General Objectives

Rehabilitate the basic principles of Drawing, combating stereotypes and valuing its importance in designer training.
Reinforce awareness of visual thinking and its operability.

15. Specific Objectives

Disciplining observation, fostering a growing visual acumen.
Develop/extend/apply a graphic-visual lexicon.
Rehearse/master/versatilize/combine with each other different ways of operating applied to representation.

16. Skills to be acquired

Ability to critically observe visual realities.
Ability to graphically communicate ideas and impressions.
Ability to versatilely handle different tools and supports.
Ability to understand perception/imagination, replacement/transfiguration, observation/invention, drawing/project relationships.

17. Teaching Methodology

FUNDAÇÃO MINERVA CULTURA - ENSINO E INVESTIGAÇÃO CIENTÍFICA

Rua da Junqueira, 188 a 198 - 1349-001 LISBOA - Telefone 213 611 500 - Fax 213 638 307 - e-mail: info@lis.ulusiada.pt - https://www.lis.ulusiada.pt

Development of image analysis exercises from the universe of Drawing.
Development of practical observation/representation exercises of increasing complexity.
Development of practical transposition exercises: from observation to invention, from replacement to transfiguration.
Collective reading of the answers to the exercises, stimulating self-criticism and reasoned criticism.

18. Course Unit Program

1. Reading culturally significant reference images from the perspective of:
Recognize the anatomy of brands, their abstract condition, their intrinsic intentionality and their communicative potential.
Understand representation as simulation.
Understand the potential articulations between the representation of the existing and the design of new objects.
2. Graphical representation of physical models, from the perspective of:
Understand and restore contrast levels between objects of different natures.
Determine different levels of synthesis in representations, managing emphatic/exclusion relationships.
Multiply/exercise different operating modes.
Attest coherence/equivalence of meanings between modes.
Rehearsing graphic transfigurations: from the image of the physical object to that of the invented object.
Work on the notions of three-dimensionality and spatiality based on figure-ground relationships.

19. Assessment Methods

. Continuous elaboration of a document for the organization and selection of the results, making the logic of the contents compatible with a logic of presentation.
. Continuous construction of an individual "Sketchbook" promoting the relevance of the sketched drawing along with project thinking.
. Integration of other items such as attendance, punctuality, participation, level of commitment, self-criticism, work rhythm, coherence and consistency of the individual path.

20. Didactic Resources

Use of models adjusted to the problems posed.
Commented projection of images (mainly drawings by authors from different backgrounds).
Projection of videos of recognized opportunity for the subjects under study.
Dissemination, exhibition and possible reading of parts of books/texts related to current topics.

21. Sustainability Objectives

This UC intends to contribute to sustainability in the following general areas:
1 - Ensure equal access to quality technical, professional and cultural education.
2 - Guarantee equal opportunities in university education, including for people in vulnerable situations.
3 - Promoting the judicious dematerialisation of the teaching/learning process.
