13. Teaching Language

Portuguese

14. General Objectives

Introduction to computer networks and the protocols used on the Internet.

15. Specific Objectives

This curricular unit is an introduction to computer networks, focused on the Internet. This curricular unit studies the mechanisms of the Internet and modern computer networks. We look at protocols, architectures and implementations of it.

16. Skills to be acquired

Upon successful completion of the course, students will be able to operate multi-layer protocols, particularly the OSI and TCP/IP models, understand the differences between various network topologies, and have an understanding of the most commonly used protocols on the Internet.

17. Teaching Methodology

Teaching will be based on the oral transmission of information related to the topics under study, followed by the resolution of exercises appropriate to the problems under study and, when relevant, laboratory practices.

Application Layer: HTTP, FTP, Email, SMTP, DNS, P2P, Sockets programming
Transport Layer: Multiplexing and Demultiplexing. Connectionless Transport: UDP Reliable Data Transfer Connection-Oriented Transport: TCP Flow/Congestion Control
Network Layer: Virtual Circuit and Datagram Networks Router, IP.
Link Layer: Error-Detection and -Correction Techniques, Multiple Access, Ethernet, VLAN
Physical Layer: Data and Signals, Bandwidth Utilization

19. Assessment Methods

According to the school's internal regulations, the assessment will have a continuous and a frequency component. The continuous component will comply with the rules established by the appropriate regulations.

20. Didactic Resources

Classes will be taught using visual presentations and computer systems will be made available for carrying out pratical exercises.

21. Sustainability Objectives

As sustainability objectives, within the framework and definition of the UN (United Nations), we can mention point 4. Quality Education, given the quality of teaching provided at Lusíada University, guaranteed by the Quality Assurance Department. Point 5. Gender Equality, guaranteed by the process defined by the "Code of Good Conduct for the Prevention and Combat of Harassment in the Workplace" as well as the "Complaint Portal." And finally, 9. Industry, Innovation, and Infrastructure: Computer

22. Keywords

ISO model
Circuit/packet switching
Sockets
Reliable transport
Traffic control
